

PER SAGE

INTRODUCES

POPickup

Make Money At The Touch Of A Button

As a store owner, wouldn't you like to offer your PO Box customers something better than your competitors? Wouldn't you like to eliminate the interruption of customer calls asking you to check their mailboxes while at the same time provide improved service as well? Well, you can with POPickup.

PerSage Inc, a corporation that provides internet-based notification services, is introducing POPickup™ to solve this age-old problem. POPickup™ is an alert system that notifies PO Box renters when they have mail or packages. It turns your ordinary mail repository into an automated "smart mailbox".

PerSage is offering a Partner Program to store owners everywhere to upgrade their mailboxes with POPickup™.

What is POPickup™?

POPickup™ is an innovative device that is comprised of a Gateway and a Sensor.

The Gateway connects to your PC so you can easily activate the system. The Sensor attaches to existing mail boxes. Utilizing the sensor, a mail clerk or store operator pushes a button to send messages, pre-configured by you, to the box renter.

Your box renter can choose to be notified through email, or cell phone (SMS/text message). They can also check the POPickup web site for the status of their boxes. It's that simple.

What you get as a PerSage Partner:

- **Differentiated Service** – Rent your PO boxes faster with a service that customers need and appreciate.
- **Increased Revenue and Profit** - PO Box renters, who want the service, pay a small subscription fee which is shared between PerSage and you as the store owner.
- **Easy to operate** - POPickup™ is designed to be very simple to install and very simple to use. And if there are questions, the PerSage support line will be happy to help.
- **Free Advertising** - You can use the mail notification message to advertise store specials or other revenue-generating services to your POPickup customers.

How to get started;

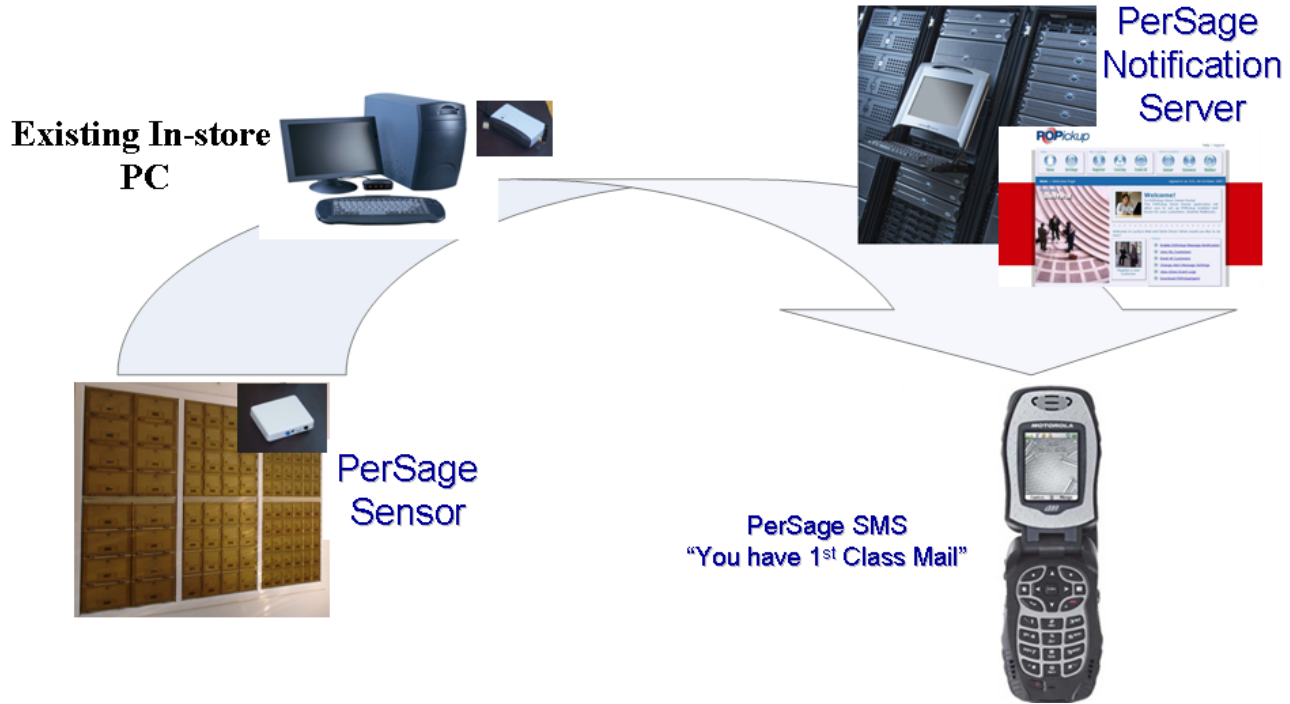

- Decide which of your customers are likely users of this premium service.
- Purchase a Partner Kit (which includes one Gateway and 5 Sensors).
- Install and go!
